

# DURALATCH

**Toter**<sup>®</sup>  
Built for Extremes<sup>®</sup>

## Duralatch

No other curbside collection cart is built for extremes like a Toter with DuraLatch. This simple-to-use latch stands up to rain, wind gusts up to 65 MPH, pesky critters and the day-to-day abuse of curbside waste collection. Fully compatible with automated waste collection trucks, DuraLatch features gravity-based functionality, meaning the lid opens automatically when garbage truck tips and empties the cart. Then cart must be manually latched when it's set back down on the curb.

- Opens automatically when garbage truck lifts it and then latches when it's set back down on the curb
- Stands up to the forces of Mother Nature (withstands wind gusts up to 65 MPH)
- Critter-resistant
- Protects cart contents from rain and moisture

## 48, 64, or 96 Gallon Cart With Duralatch
